Developing natural resource web content with Upper Delaware Scenic and Recreational River

Project Title	Developing natural resource web content with Upper Delaware Scenic and Recreational River
Project Summary	Help connect the public to the natural resources that make Upper Delaware Scenic and Recreational River (UPDE) special by developing factual relevant web content. As a unit of the National Park Service, UPDE seeks to protect the resources which make the area unique and worthy of protection.
Country	United States

Project Description

Researching, writing, and editing factual information on natural resource related topics will be a key component of this internship. Project will also include searching NPS and other agency websites that may help to generate ideas. Intern will have input on the content that may include animals, plants, fungi, environmental factors, natural features, and ecosystems. Social media content may also be developed in many of the same categories.

There may also be opportunities to work with other VSFS interns and other UPDE divisions on related content.

We are looking for an individual with excellent research, writing, and editing skills. An interest in fish, wildlife, and other natural resources would be helpful, but not required.

Required Skills or Interests

Skill(s)
Editing and proofreading
Research
Writing

Additional Information

You will be directly supervised by the UPDE Ecologist and may also interact with the Chief of Interpretation, Chief of Natural Resources, Biologist, as well as the Cultural Resources Division.
